**PRECYSETECH ANNOUNCES TEAMING AGREEMENT WITH PATROCINIUM SYSTEMS  
ENHANCING inPALM<sup>sm</sup> APPLICATIONS WITH NEW VISUALIZATION, MOBILE PHONE ACCESS,  
SITUATIONAL AWARENESS AND ANALYTICS SOLUTIONS**

*Creating New inPALM<sup>sm</sup> Integrated Applications To Improve Security, Cost Performance, and Safety*

**Reston, VA December 6, 2016.** PrecyseTech Corporation (“PrecyseTech”) announced today a teaming agreement to offer Patrocinium’s SaaS-based *ArcAngel*<sup>TM</sup> portfolio of visualization, security, communications, and analytics tools within PrecyseTech’s upcoming inPALM<sup>sm</sup> cloud-based asset management and analytics portfolio. The *ArcAngel* portfolio includes *ArcLive*, a Visualization Dashboard supporting multiple visual feeds providing geotemporal 4D visualization, modeling, and playback; *ArcPulse*, an Internet of Things (IoT) sensor integration platform enabling data feeds, cameras, video analytics and access control devices to connect to the visualization platform; and the *ArcAngel* App that links directly to mobile phones, both to provide communication alerts and use phone location data to support emergency response. With these three tools, Patrocinium’s platform integrates structured and unstructured data to provide composite operations and incident intelligence and analytics to improve response times and operations. Users can send video, picture, and text information about their location and the emergency to security personnel. Security personnel send updates to users with the information gathered for personal situational awareness of the emergency event. Response is targeted to those in harm’s way helping to save lives in an emergency. Integrating the *ArcAngel* portfolio with PrecyseTech’s proprietary, proven asset tracking network technology and upcoming inPALM<sup>sm</sup> cloud-based SaaS solutions enhances the scope and reach of IOT capabilities offered to users.

“We foresee integration of the *ArcAngel* applications portfolio opens up exciting new capabilities we can offer both our enterprise IOT network and upcoming inPALM<sup>sm</sup> cloud-based users,” said Paul B. Silverman, PrecyseTech President and CEO. “Powerful new 4D visualization features, integration of multiple data sources, enhanced analytics, and, most important, extending inPALM<sup>sm</sup> to access mobile phones via the *ArcAngel* App are significant enhancements for the new inPALM<sup>sm</sup> offering,” said Silverman.

PrecyseTech will be demonstrating the integrated ArcAngel service capabilities for users starting in early January.

“PrecyseTech’s clients and prospects are Fortune 500 players in oil and gas, construction, energy companies, first responders and transportation agencies which are also opportunity targets for Patrocinium,” said John South, President and CEO, Patrocinium Systems. “We look forward to working with the PrecyseTech team to pursue new joint business opportunities in 2017,” said South.

#### **About Patrocinium Systems**

*Safe. Anytime. Anywhere.*

Patrocinium Systems is a visionary IOT cloud-based emergency management and crisis resolution software solutions for enterprise clients. Patented ArcAngel technology allows enterprise clients to communicate with all users in the location of an emergency, thus mitigating exposure to corporate risk and reducing liability. Patrocinium Systems aggregates, visualizes, and shares real-time data in a unique and quantifiable way, providing actionable intelligence to all stakeholders impacted by and responding to a man-made or natural disaster whether accidental or intentional while communicating with the public. Enterprise clients looking to account for their global workforce or promote commercial real estate safety use ArcAngel to increase awareness and maximize communication in an emergency allowing organizations to reduce recovery time of business processes while visualizing and recording emergencies in 4D. For additional information on Patrocinium Systems products and solutions, visit their website at <http://www.patrocinium.com>.

#### **Forward-Looking Statements**

Certain statements above, in press releases and PrecyseTech officials oral statements are "Forward-Looking Statements" (FLS) according to the Private Securities Litigation Reform Act of 1995 (the "Act"). FLS include statements predictive in nature, depending upon or referring to future events / conditions, including words like "believes," "anticipates," "intends," "plans," "expects," and similar expressions. Statements concerning future financial performance
